JAMES T. SCOTT.

INTRODUCTORY

IN presenting our price list for 1921, we again take this opportunity to thank our customers for their liberal support and patronage and to assure them that their orders will receive as careful attention in the future as they have in the past.

We now have 60 acres of land in Elmsford, most of which is planted in Nursery Stock. The most exacting buyers will find with us a fairly complete assortment.

Delivery. The prices herein named are at our Nursery, or F. O. B. the Express and Railroad Station at Elmsford, unless otherwise agreed. Where delivery is made by truck a charge sufficient to cover cost will be made.

Packing. The rise in cost of labor and all materials used in packing compels us to make a nominal charge for labor and materials used.

Guarantee. In accord with all the leading nurseries in the country, we cannot assume responsibility for failure due to unfavorable planting, or growing conditions, and we will in no way be responsible for the results. Our stock is fully up to grade and has been several times transplanted, giving it a good root system.

It will be shipped and handled with the utmost care—after that our responsibility ceases.

Landscape Work. We have now on hand several large landscape contracts, including the planting at Kensico Dam, for the New York Board of Water Supply. We are well equipped for such work, and will be glad to submit suggestions, plans and estimates, on large or small jobs.

Greenhouse Stock. We have on hand a large stock of everything herein listed, but the demand is heavy and we advise early orders before the stock is exhausted. We shall exert ourselves in maintaining our reputation for high class goods, and those who intrust us with their patronage may rest assured that the stock supplied will be the best procurable.

Grass Seed

Elmsford Evergreen Lawn Grass Mixture.—We have made an extensive study of grasses, and have here combined in one mixture several of the very best kinds in such proportions as will give the best results. Other will stand the heat and drought of summer, and others again will keep growing until late in the Fall. We consider our "Elmsford Evergreen Mixture" to be as good as any on the market to-day. For new lawns, sow 85 to 100 pounds to the acre. **Per bushel (20 pounds), \$7.50.**

Landscape Department

The landscape department of the Nursery business, is undoubtedly the most important branch of it. We are well equipped to under take the development of either large or small Estates.

The individual members of our firm have all had a life experience in this work and are well qualified to give practical advice in the development of new places, or the renovation and care of old ones. We were the successful contractors last year for the development of the landscape features of the "Kensico Dam" at Valhalla, N. Y., for the "Board of Water Supply," of New York City. In spite of adverse labor conditions and freight tie-ups, we finished ahead of the specified contract time, to the entire satisfaction of the City Engineers.

We have been the successful bidders for several years, for supplying the various materials for the beautifying of the extensive grounds of the Kensico Cemetery at Kensico, N. Y. The most up to date cemetery in the environments of New York. We have also developed and renovated a number of new and old places recently. The names of the owners will be cheerfully given upon request. We have a complete equipment for moving large trees successfully.

Our advice will be cheerfully given at any time. We will also prepare plans and estimates for Grading, Road Making, Preparation and Seeding down of Lawns, and Supplying and Planting of Trees, Shrubs, etc.

Drop us a line and we will be on the job or call and see us; we are always accessible.
